WEATHER OF CONCERN

Weather of Concern

- High pressure over the eastern Pacific and west coast will bring warm and very dry conditions over the next several days. Breezy north winds will bring increased fire danger through Tuesday night.
- A Red Flag Warning is now in effect for the North and East Bay Hills through Wednesday afternoon. Northeast winds 10-20 mph, with gusts up to 25mph will be possible. Humidity values will be around 15% during the afternoon hours, and less than 30% for these areas overnight.

Active Weather Warnings, Watches and Advisories by County:

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

High pressure over the Pacific NW will remain in place for a few more days. This will generate light to moderately strong, gusty N to NE winds with low daytime RH and poor to moderate overnight RH recovery in the Sacramento Valley/Surrounding Foothills and portions of the Bay Area and Mid Coast to Mendocino PSA's. This will lead to a marginal "High Risk" event of Significant Fire Potential for the Sacramento Valley and Surrounding Foothills Monday into Tuesday and increase Significant Fire Potential in portions of the other areas mentioned. Peak wind gusts during this event will be 20-30 mph at times in and around the Sacramento Valley today through Tuesday morning, and minimum RH will likely range from about 12-18%. Late Wednesday the high will begin shifting inland and a weak low pressure trough will arrive Friday. Dry, mild weather will remain in place all week in spite of that trough arriving late in the week.

Temperatures will be warming to around normal values or slightly above early this week and remain there (low 90's warmest inland valleys). Lowest afternoon RH will largely be around 15-20% much of the week. Lighter winds are expected starting Wednesday.

SOUTHERN CALIFORNIA

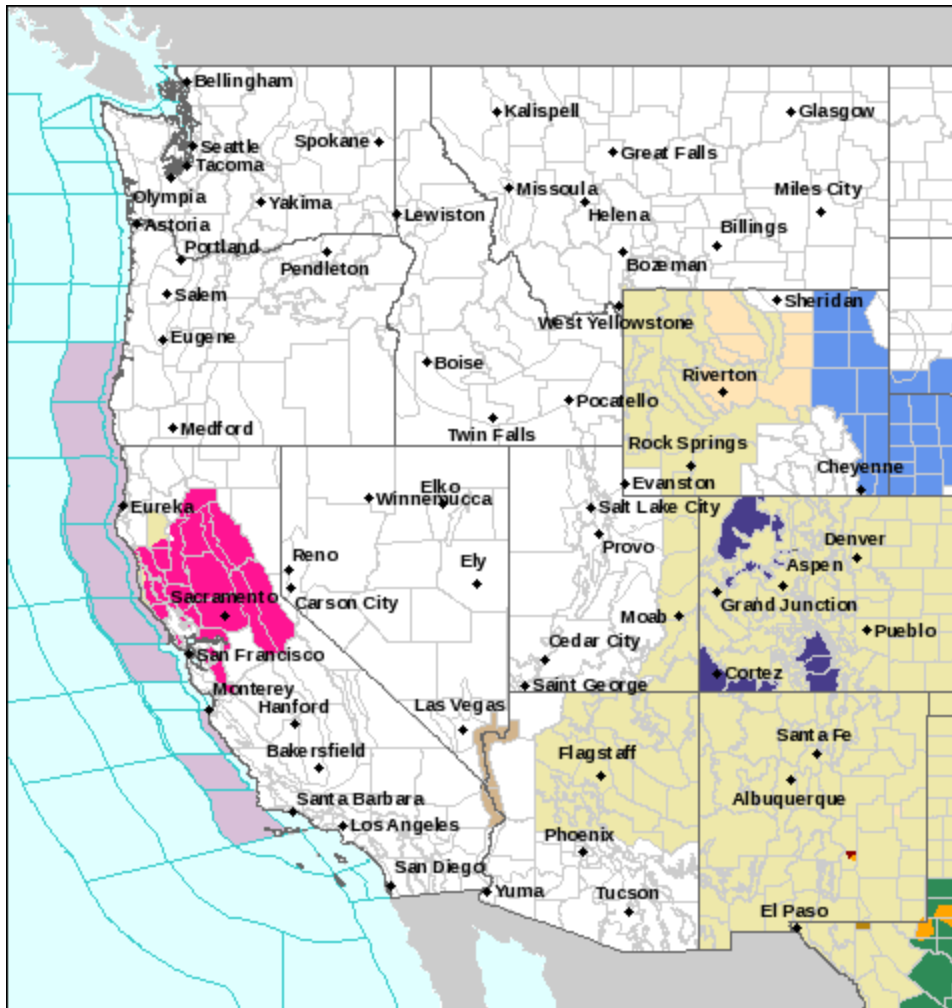

Gusty offshore winds across Southern California through Wednesday morning

Warm and dry through this weekend

Surface high pressure over the Great Basin will bring local offshore winds of 15 to 25 mph with gusts to 40 mph to the mountains and below the canyons and passes of Southern California through Wednesday morning. High pressure aloft over the eastern Pacific Ocean will bring a couple degrees of warming along with minimum humidity in the teens each day through this weekend. Maximum temperatures will be in the mid 60s to mid 70s across the mountains and 80s to low 90s in the valleys today. Light offshore flow will occur Wednesday afternoon through this weekend.
